John -

DCI asked me to look these transcripts over, and I'm taking the liberty of sending them to ~~x~~ you rather than returning them direct to [redacted]

I think you might be particularly interested in the Hardy/Blandford brush, pp 116-120.

Secondly, note that concluding page shuts us out all week and until after the Lincoln's birthday recess.

Third, questioning from p. 143 through end of first day's session is by a man addressed by Rivers as "Dr. Hall," who doesn't even appear in my 98th Congress Directory, but appears to be up to his ears in Airlift Subcommittee, and questioned quite aggressively. Who he?
